

PROJECT PROPOSAL

Project Title: FreshScan

Problem Statement:

The majority of the time when we make a purchase and leave it in the refrigerator or cabinet, we often forget about the expiry date until it's too late, and possibly even eating expired food leading to food poisoning.

Project Objectives:

- Scan QR codes that are embedded with expiry dates
- Generate sheets with QR codes
- Track food expiration dates
- Notify users when a food is about to expire and when it expires.

Planned Features:

QR code scanner

QR code sheet generator

Food expiration notifications

Food expiration tracking dashboard

Planned Inputs and Outputs:

Inputs:

- Food name
- Food expiration date
- Food comments
- Username

Outputs:

- Notifications when the food is about to expire and when it expires
- Statistics on food expiration
- Confirmation that food was saved into tracking system

Logic Plan (Flowchart):
